We serve a wide range of industries including construction, utility contractors, telecommunications, and municipal projects- with a focus on accurately and safely locating underground utilities.

At Extreme Hydro-vac, our mission is to deliver safe, precise, and responsible hydro-excavation services that protect underground infrastructure, support our clients' success, and uphold the highest standards of safety, reliability and professionalism on every jobsite. We are committed to being the trusted partner in underground utility work combining advanced technology, expert crews, and a strong work ethic to complete every project with integrity and excellence.

Why Work With Us

- Damage -Free Digging: Our noninvasive hydro-vac technology protects critical utilities and reduces costly repairs
- Experienced Team: Our Trained technicians and operators bring years of expertise to every project.
- Fast & Efficient: We get the job done right-on time and within budget-without cutting corners.
- Versatile & Reliable: Weather it's a tight urban space or remote rural site, we have the tools and trucks to handle it.
